

# Barmate™

## Wireless liquor control and P.O.S. system in ONE!

Take a closer look. There's never been anything like this before.

Barmate's unique spouts are totally independent. No wires or attached tubes to limit bartender freedom. Yet they provide continuous up-to-the minute central information about the brands and amounts poured in your bar.

Barmate spouts use a sophisticated **valve** mechanism to dispense **exact shots** (selectable, 1/4 to 2 oz.) plus **instant radio transmission** to display and record the brand, amount poured, price, server's name, time and date on a PC computer. No ring actuators or tedious after-hours polling! The Windows®-based software generates detailed sales, inventory, and end-of-shift reports with the click of a mouse. And Barmate's touch-screen P.O.S. system allows **automatic ring-ups** as drinks are poured to be combined with other beverage and food transactions for **complete point-of-sale convenience!** No other liquor control system offers this unique combination of features.

**#1 in quality, reliability, and technology with a money-back guarantee to prove it!**

**Barmate... the system of choice to better serve your customers, and your bottom line.**

Patents pending.

Made in USA.
